

ADDENSANTE 200

Rheologic thickener additive for epoxy products

Description and use

Addensante 200 is a siliceous additive with an high tixotropic power

Suitable to thicken smoothing products used for thin plaster. In products for wall coatings it can help the coverage during hot periods to reduce percolation.

Storage

- Eight months in a dry environment not exposed to atmospheric agents, with a temperature between 10°C and 30°C

TECHNICAL CHARACTERISTICS

Product hardening at 23°C - 7 days

Aspect	Amorphous silicon dioxide
Colour	White powder with blue shades
Specific square Bet (m ² /g)	200 - Tolerance limit 25
Density of Bulk (g/l)	<ul style="list-style-type: none"> • 120 ÷ 140 compacted • 40 ÷ 60 not compacted
Humidity (%)	< 1,5
Packaging (Kg)	10
